About MegaBasket

It's a very simple and exiting game which allows you to check your reaction as well as your good eye! The goal of this game is to score the maximum number of points during the certain period of time by shooting the basketball into the basket. Remember that time is feighting against you!

Instructions

So, you should place the player into the position suitable for throwing the ball. For that you should tap the "Touch Screen" area (7) which is divided into 3 sectors. If you shoot the ball and get into the basket from the far sector you will score 3 points, successful shooting of the ball from the middle sector will bring you 2 points and from the position next to the basket - 1 point. Window 3 on the upper panel indicates the player's selected position. After you have selected the sector for throwing the ball touch and hold the stylus at any point of the screen beyond the "Touch Screen" zone (7). At this the power reading starts rising on power indicator (1). Be attentive! You should release the stylus as soon as the power indication reaches the required value (otherwise the ball will be thrown with maximum power and might miss the basket). After that touch and hold the stylus at the point of the screen for preselecting the required ball trajectory which is indicated in window 2 on the upper panel. As soon as you release the stylus the player will shoot the ball according to the preselected parameters.

Additional information indicated on the upper panel:

- Time for one game - 3 min. (window 4)
- Total number of ball shoots (window 5)
- Score (window 6)

For each successful shooting of the ball you will be awarded by extra-time:
for 3 point shoot - 4 sec.
for 2 point shoot - 3 sec.
for 1 point shoot - 2 sec.

Free usage of the MegaBasket is limited by time (14 days) or 5 games.
