WELCOME

Welcome to use Sea Warrior.

Features:

1. Support Bluetooth.
2. Support Infrared.

INTRODUCE

Sea Warrior is a Battle Ship game.

This game could play with computer or play with another person. The link could be IrDA or Bluetooth. Each player has 5 ships on the war zone, patrol boat needs two grids, submarine needs three grids, destroyer needs three grids, battle ship needs four grids, and carrier needs five grids. The war zone has 10x10 grids. When the both side arranged their ships, the fight began. Each fires one shot per turn, until one's ships were all sunk.

How To Install

Extract all files in the Package into hard drive. Synchronize *SeaWarrior.prc* to your handheld.

Now run **Sea Warrior** and tap the screen to play the game!

If you've got any queries about Sea Warrior or the registration process, first check out our **frequently asked questions page** on our website (you must be connected to the internet). If this doesn't help, contact us at support@palmsoft.com.cn. If you've got any questions or suggestions about the game itself, please contact us.

Playing Sea Warrior

The game is very easy and funny.

Getting start

When you start Sea Warrior, here shows the main menu. On the main menu there have 6 buttons, they are **New Game**, **Option**, **Ranking**, **About/Register**, **Help**, **Exit**.

Tap **New Game** button, the New Game window will popup to choose your opponent. You can choose the Palm, or a player via IrDA or Bluetooth.

Tap **Option** button to popup the option widow.

Tap **Ranking** button to popup the option widow.

Tap **About/Register** button, here shows some information about our corporation and this game. The Register window shows your HotSync name, and the blank to input register number.

Tap **Help** button to view online help.

Tap **Exit** button, you exit this game.

Wireless

If you like to play with another player wirelessly, both players must **enter** the New Game window, and only **one** player find and select opponent, the other sit tight and wait.

When you've chosen an opponent, and after the other player has accepted your request, a new dialog pops up to let you and your opponent choose who goes first. Then you can start the game. If the other player declined your request, you will need to choose another opponent.

Arranging ships

After you have entered the war zone, you may arrange your ships.

After tap one ship, there are a red rectangle around the ship and a red cross showing the ship's rotating center. You can move the ship by dragging it to a new position or tapping on an empty cell, or rotate by tapping the **Rotate** button on the upper left corner.

Fighting

While you arranged all ships, tap **Start** button to start, the game will start after both players pressed the **Start** button.

Each player fires one shot in turn until one side down.

If you want to give up, you can tap the **Surrender** button to stop this game.

Tap the Menu silk button to popup the Menu window.

Game Status

On the left of the war zone, shows your ships' status, red means sunk and green not. And there are two group of hit numbers below the ships' status, showing the number of points which had been hit (left of the slash) and the total number to be hit (right of the slash), the yellow number are your opponent's hit number and the reds are yours.

War Status

On the bottom left corner of the war zone, a small window shows your ships' arrangement by blue color, opponent's attacks by green, hit points by red.

Chat

In the whole course, you can chat with your opponent by **input field** and **Chat** button, if you are in a wireless game.

Options Window

On the main menu you tap **Option** button, and you can choose whether need to have sound and whether need to vibrate when being hit.

Ranking Window

On the main menu you tap **Ranking** button. Here shows how many games you have played, won and lost. Your ranking information shows at the lower part of the window.

Online help

On the main menu you tap **Help** button, and you can get helps online.

Registering

If you **beam a demo** to someone else, and they also like the game, then they can purchase online.

If you downloaded the game straight from the Internet, then your copy is in 'Demo' form. Demo means that you can play for free to decide whether to register it or not, but the program will stop working after 10 plays.

Registering Online:

For those that like the speed and convenience of buying of the Internet when you register for the game, you will get a key, which will unlock the game.

You will need to know your **HotSync Name** which you can find by HotSync, or going into the menu, and selecting the **Register** option. Your **HotSync Name** (or username) will be here.

Go to the web page at <http://www.palmsoft.com.cn> for more details.

When you register, we will generate a key, which will normally be sent out by email within 24 business hours of you registering. When you received your key, go to the same register option, and enter the key into the space provided.
