

## IrSketch v 1.0 for PalmOS

Copyright (c) 2000 by Mark Chao-Kuang Yang

### IrSketch Application

Simply tap on the IrSketch application icon on Palm to use the application

---

## Sketch List

This panel lets you select your favorite "Sketch Paper". Simply tap on the paper to write on.

**sketch paper:** tap on the paper to begin sketching! After selecting a paper, IrSketch brings you to [Sketch Board](#).

**connect button:** connect to another IrSketch application

**about button:** shows the about dialog

**Item Display Mode Button:** This button selects the view mode. You can select between the following:

- **sketch only:** shows only sketch preview
- **image only:** shows only the paper image icon
- **image & sketch:** shows both paper image icon and sketch preview on top of the icon

**Selection Modes:** There are 4 modes to select Sketch Papers.

- **view:** selects the Sketch Paper to write on
- **info:** shows the information about the Sketch Paper
- **beam:** use infrared to beam the paper to another Palm device
- 

**trash:** delete the Sketch Paper

---

## The Sketch Board

This panel allows you to draw on top of the selected Sketch Paper.

**Done button:** brings you back to [Sketch List](#) panel!

**page buttons:** the feature for each button from left to right, respectively:

- **new page button:** creates a new page
- **clear button:** clears the current page
- **trash button:** deletes the current page

**\*note:** these buttons aren't available for client Palm device.

**pen list :** shows all the available pens

**brush list:** shows all the available brushes

**page number buttons:** shows the current page number, providing going to next or previous page if available

**\*note:** these buttons aren't available for client Palm device.

**ir transferring progress indicator:** shows the progress while transferring data between two palm devices. when transferring is happening, no drawing is allowed.

**ir status indicator/button:** there are 3 modes for IR data transferring.

- disconnected:  
IR is enabled and not connected
- connected: IR is enabled and communicating with another Palm device
- disabled: you can toggle enable/disable by tapping on this button.  
when ir is disabled, the IR data transferring wouldn't happen between two Palm devices.

**\*note:** disabling IR isn't available for client Palm.

## Sharing Sketch Board via IR port

Connecting...

While in the [Sketch Board](#), simply tell your Palm friend to go to the Client Sketch Board by tapping [Connect Button](#) in [Sketch List](#). Point the infrared ports on both your and your friend's Palm to each other. Wait for the connection to be done (indicated by  ). After the connection is made, both Palm devices can work on the same Sketch.

Client Sketch Board is different from the regular Sketch Board as the following:

- All page functions, including **new page**, **clear page**, **delete page**, **goto previous/next page**, and **page number** are not available.
- Disabling IR Port is available.

In simple words, only **pen** and **brush** are available.
