

FLYZIP XR

Version 1.7

**Compress and decompress
at the speed of light!**

INTRODUCTION

FLY ZIP XR is a fast and easy to use compressing and decompressing utility, operating right on your Palm. With FlyZip, you can double the amount of data stored on your Palm, without modifying your hardware.

FLY ZIP XR is small, elegant yet powerful application that uses only 20K on your Palm.

FLY ZIP XR compresses the application file together with corresponding data files with one easy operation (tap). Self-Extraction function is supported.

FLY ZIP XR has a compression rate on industry standard Calgary corpus of 2.32:1. Compression speed on a standard Palm is about 30kB/sec, which allows compressing or decompressing 100kB file in only 3-4 seconds.

FLY ZIP XR uses patent pending compression technology, which is optimized for handheld devices.

Minimal Requirements for Use

Any Palm OS based Hardware, Palm OS 3.2 or later.

INSTALLING FlyZip XR FOR PALM OS

Important: Before installing any new software, run HotSync to back up data.

Windows

1. Unzip the FlyZip XR file using the free Winzip, PKUnzip, Infozip or other such utility.
2. Double click on FlyZip XR “.prc” file and select your Palm user name from the list.
3. Click "Done" and then Hotsync your Palm.

After synchronization, tap on the FlyZip on your Palm device.

Mac

1. Unstuff the FlyZip XR file using your Stuffit compression software. Next, open HotSync Manager on your Mac and select Install from the HotSync Menu.
2. Locate the FlyZip XR “.prc” file using the Add to List button. Once you locate FlyZip XR “.prc” file, select Open, then Add File.
3. Set your Palm in the cradle and press the HotSync button.
4. Synchronize your Palm. After synchronizing, tap the FlyZip icon on your PDA. You should see the FlyZip icon in alphabetical order with the other Palm applications. Tap the FlyZip icon to run it.

UPGRADING FlyZip XR FOR PALM OS

Important: Before upgrading any new software, run HotSync operation to back up data.

Important: If you are upgrading from an earlier version of FlyZip XR, simply install the new version over the old one.

Important: All users who have purchased FlyZip XR 1.x are entitled to all free upgrades of FlyZip XR 1.x

Windows

1. Double click on FlyZip XR “.prc” file and select your Palm user name from the list.
2. Click "Done" and then Hotsync your Palm.

After synchronization, tap on the FlyZip icon on your Palm device.

Mac

1. Locate the FlyZip XR “.prc” file using the Add to List button. Once you locate FlyZip XR “.prc” file, select Open, then Add File.
2. Set your Palm in the cradle and press the HotSync button.
3. Synchronize your Palm. After synchronizing, tap the FlyZip icon on your PDA. You should see the FlyZip icon in alphabetical order with the other Palm applications. Tap the FlyZip icon to run it.

Removing FlyZip XR FOR PALM OS

Important: Before removing Fly-Zip, run HotSync to back up data.

1. Run FlyZip on your palm
2. Decompress ALL compressed software

Important: If you don't decompress your software and delete FlyZip from your Palm, ALL your compressed software could be lost.

Note: Removed FlyZip XR, compressed applications with FlyZip self extraction will

change icon to default. Trying to launch this application will cause the error. You need to install FlyZip XR to use this application or reinstall application from backup.

3. Delete FlyZip software from your palm

Using FlyZip XR FOR PALM OS

Running FlyZip XR

Locate FlyZip on your Palm under FlyZip category, by default. FlyZip XR looks like a fly on your screen. Tap on the FlyZip icon.

FlyZip XR interface

FlyZip		free: 51k
14allCalc		28k
AfterBurner Hack		11k
Benchmark	76%	5k
BigClock	65%	44k
Billiards_64KColor	48%	141k
BjChamp		94k
Bridge	52%	78k
Clickomania2002		385k
DataKeeper32	53%	47k
DateBookonClock		44k
FlipHack		17k
HandyShop2		197k

All compressed programs are displayed in the Palm usual font. All uncompressed applications are bolded.

Next to the program name are percentages, displaying the size of the program after compression.

Program column:

1. Programs in bold type are uncompressed programs.
2. Programs in normal type are compressed showing the space the compress files takes up.

Top Left (FlyZip):

You can access Help and About from the drop down menu.

Top Right: (free:51k)

Shows free space on your Palm.

Compressing any application

Important: You will find existing software on your Palm that isn't displayed in FlyZip for compressing.

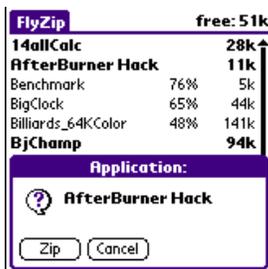

You won't be able to compress:

1. Active programs (like Hack)
2. Compressing software can cause Palm errors
3. Built-in Palm software
4. All software that is fully or partly stored on flash memory
5. The FlyZip program – it can't be compressed! :-)

Important: self-extraction archive feature is added by default.

Note: self-extraction is available only for application. FlyZip will not make self-extraction archive for databases and so on.

Find software what you want to compress from the list. Tap on the name.

A pop up screen will be launched.

On that screen, find a program try to compress and click on Zip to start compression.

If you don't want to compress this application or you clicked the file accidentally, click Cancel.

Note: Compressed application with self-extraction archive will be located in your launcher under the FlyZip category. Application icon will be changed to FlyZip icon. If you can't locate compressed application in your launcher, it means launcher isn't supporting self-extracted archive. So you have to decompress application from FlyZip to use it.

Note: You need to have about 50% free space on your Palm of the application you want to compress.

This screen will show that you don't have necessary space to store the compressed application.

You can try to compress a smaller program first, clear some space and then try again.

Important:

FlyZip XR compresses the application file together with corresponding data files. FlyZip XR can't check what kind of third party products uses that application. So compressed list of application and launched, you can get error about third party product missing. You will need to decompress that missing part to use that application.

Note:

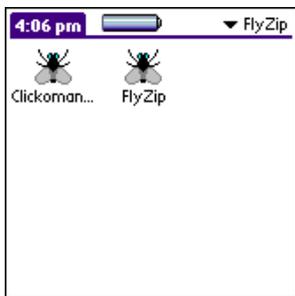

In Demo Mode you can compress only one application at a time.

Note:

In demo mode you can use self-extracted applications, but can't make self-extracted archive.

Decompressing any running application

Running self-extracted application.

Compressed application with self-extraction archive will be located in your launcher under the FlyZip category by default. Application icon will be same as FlyZip icon. Tap on the application. FlyZip will be launched, application decompressed and started. When you close application, it stays decompressed on your PDA.

Important: FlyZip XR can't check what kind of third party products uses that

application. So compressed list of application and launched, you can get error about third party product missing. You will need to decompress that missing part to use this application.

In our sample you need to decompress “Mathlib”.

Decompressing application from FlyZip XR

Find software what you want to decompress from the list. Tap on the name.

A pop up screen will be launched.

On that screen you will find the program you want to decompress. Click Unzip to start decompression. If you don't want to decompress this application or clicked by accident, click Cancel.

Other option is Delete. We'll describe this in the next step.

Note:

You need to have free space on your Palm for the application in its uncompress form plus 1K (one kilobyte).

This screen will show that you don't have necessary space to store decompressed application.

You can try to compress other applications to free more space and then try the original application you want to decompress again.

Deleting any application

Important: From the FlyZip Interface you can only delete programs compressed by FlyZip.

Important: You can delete FlyZip XR created self-extracted applications from your launcher.

Deleting application from FlyZip XR

Find software you want to delete from the list and tap on the name.

Pop up screen will be launched.

On that screen you will find the program you want to delete. Click Delete to remove that program!

A second screen will pop up to confirm you really want to delete that program.

If you made a mistake, just click Cancel.

Note: You can usually restore an accidentally deleted program from the backup folder on your computer.

Note: FlyZip won't delete applications alarms or saved preferences, etc. FlyZip will delete only the zipped files it created.

Technical Support

For frequently asked questions and the latest software updates, please visit www.fly-zip.com.

You can access technical support information on the FlyZip XR product from our website at www.fly-zip.com and by e-mail: support@fly-zip.com.

Version changes

1.7

Added self-extracting archive (creation only in registered version)

Tested and working with build in palm launcher and Launcher III

Don't allow FlyZip JackFlash. (possible crash)

Don't allow FlyZip MBIInDeviceInfo (possible data loss in AvantGo)

1.6

Added the ability to Delete compressed applications from the FlyZip interface

Added some interface improvements

Added Help. You can access the help function from FlyZip

1.5

Added first letter search.

Registration

Important: FlyZip XR is distributed in a "Demo" mode. i.e. Some functions have been disabled in the demo version. You can get the registered version directly from us at www.fly-zip.com.

Demo limitations:

You will be unable to compress more than one program at a time in the demo version. Additionally a reminder screen is shown every time you try to compress more than one program.

You can't create self-extracted archive. You can only use self-extracted applications.

To get full version, please visit www.fly-zip.com to purchase your copy.
